

What's Geographic Type JP Domain Name

This is the domain classification from which one organization can acquire one domain, when unlike "**General-Use JP Domain Name**" acquisition conditions are defined and it fulfills the acquisition condition as well as "**Organizational Type JP Domain Name**". There is "nippondata.shibuya.tokyo.jp" etc. as an example of this domain type. It is the domain form which was conscious of the area, and municipal corporations, such as each all-prefectures agency and a city office, a hospital, a company, an individual, etc. can mainly be acquired.
(*Currently, a Japanese domain cannot be registered into this type of domain.)

Handling Domain List

* "i-Navi" plug-in is required for access to a Japanese domain name site. * A domain name is a maximum of 63 characters, when it consists of alphanumeric half size characters. About the Japanese domain, a maximum of 15 characters are prescribed to be. Moreover, about a domestic domain, it is necessary to constitute from three or more (for there to be some which do not have these restrictions about an overseas domain) characters at worst. * The registration situation of a domain can be checked from "**(WHOIS) Check of a Domain Registration Situation**" page. * The list of the handling domains should access to "**Handling Domain List**" page. * Nippon Data Corporation is an official JP Registrar of JPRS
